Field Application Scientist

About the Company

BennuBio® is a young and rapidly growing biotechnology company based in Albuquerque, NM. Our proprietary instrument, the Velocyt®, is an ultra-high throughput flow cytometer that uses acoustic standing waves to focus the particle streams. It can analyze large particles such as spheroids and organoids and is particularly suited to rare events analysis on large sample volumes.

About the Job

The BennuBio Applications Team is responsible for the development, implementation, and validation of assays on the Velocyt platform. Within this group, the Field Application Scientists are responsible for the scientific success of our customers in their use of the Velocyt platform in their biomedical research, drug discovery and process monitoring activities.

What you will learn and accomplish as a member of the team

- Become a subject matter expert in the Velocyt system and its applications.
- Support the Sales team by conducting in-person, on-site product demonstrations with prospective customers.
- Train new customers on proper usage and care of their Velocyt system.
- Work with customers to troubleshoot and optimize their assays for success with the Velocyt.
- Collaborate with our in-house scientists as we develop protocols for growing, purifying, and culturing multicellular spheroids cultures.
- Conduct, troubleshoot, analyze, and summarize data from cell-based experiments.
- Work with Engineering to refine, develop and improve the platform.
- Maintain detailed customer data records in the CRM system.
- Adhere to strict lab protocols for safety and best practices.
- Attend regular team meetings and planning sessions.

What will convince us

- An advanced degree in a life science discipline or equivalent.
- At least three years' industry experience in one or more scientific area such as cell and gene therapy, phenotypic screening, immunology, drug discovery, or regenerative medicine.
- Proficiency in mammalian cell culture and experience with 3D cultures is a plus.
- Experience in flow cytometry or fluorescence microscopy.
- Strong communication and presentation skills.
- Capable of working in a multidisciplinary team.
- Ability to thrive in a changing, fast-paced environment.

Travel and Location

Our ideal Field Application Scientist candidate will be located in Albuquerque, NM and will be able to travel to customer sites up to 50% of the time, and sometimes more as needed. We will consider applicants located in Western cities such as the San Francisco Bay Area and the greater Houston area, that have a large biotechnology industry presence. Such applicants should be willing to travel 50% to customers and another 25% to the home office in Albuquerque.

What we offer

- Competitive salary
- Competitive health, dental, and vision insurance
- Paid time off
- Retirement plan
- An open, professional, and highly collaborative culture

Other Info

BennuBio is only considering applicants who have valid authorization to work in the U.S., in this position, for the Company. BennuBio does not sponsor employment-based visas for this position.
